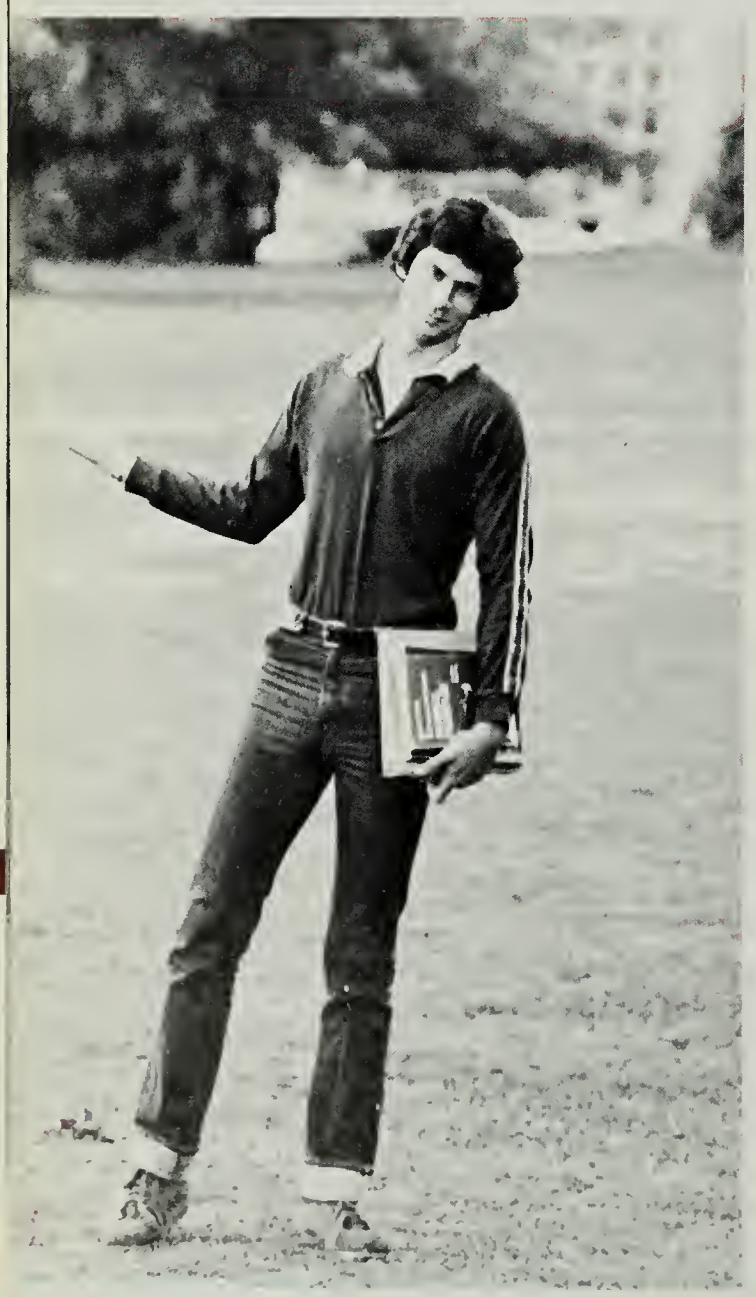
M'ville: Open to the Infinite

The Black Mountains represent the earth and the M of man. Above us is set the star, the high goal of our quest. To the right shines the sun, the light enlightening every man who comes into the world. In this light we read the book of learning, asking the meaning of our world and of ourselves. And so the cycle moves on without end. The seal, like reality, has no edges; its height and depths, its width and breadth, lie open to the infinite.

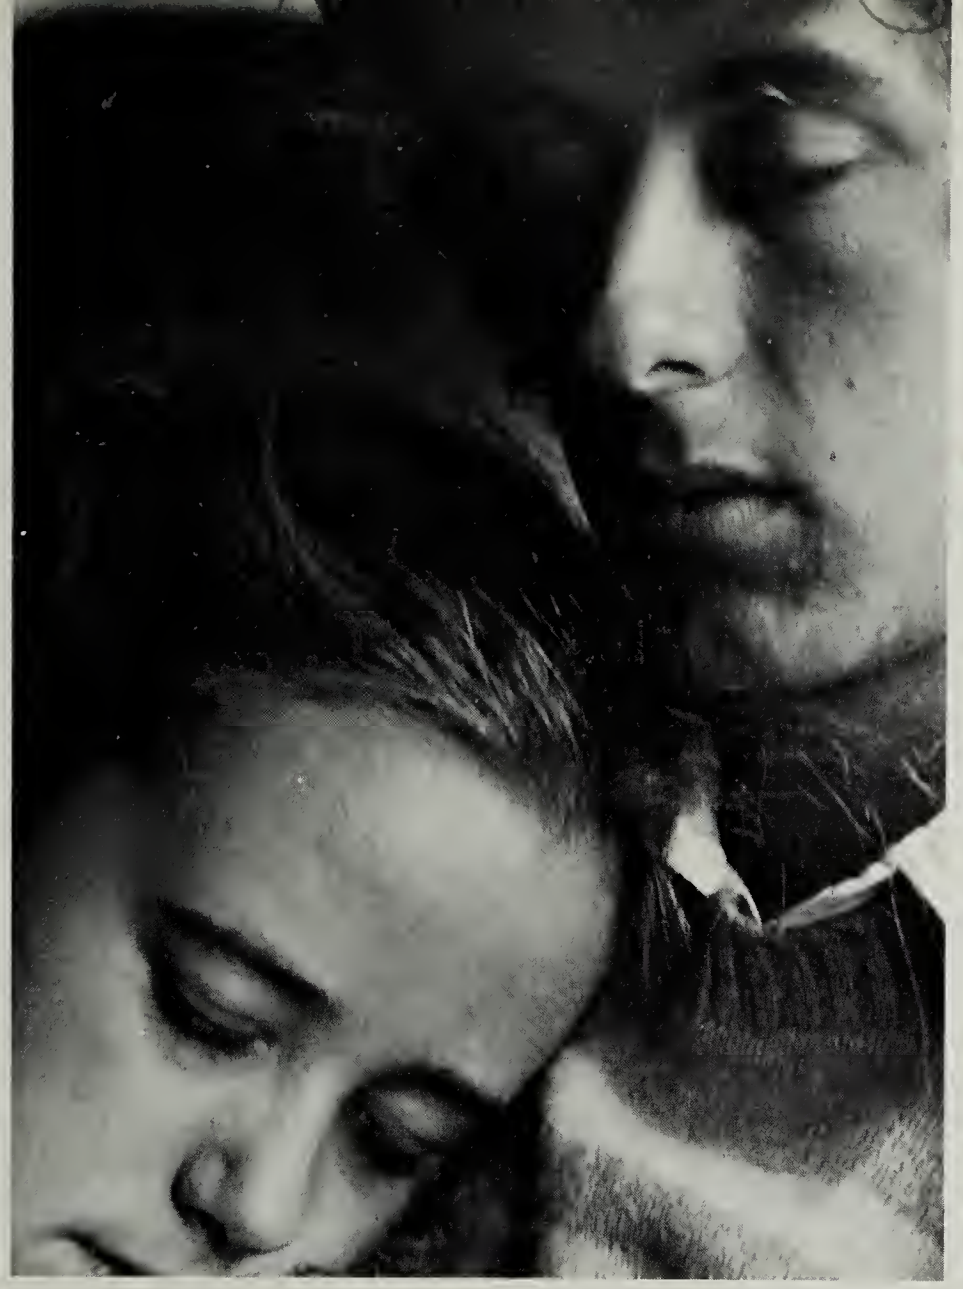


Manhattanville is Advantageously Small

Manhattanville is small. Student say that three things result from this: The college is friendly, you don't have to go off campus to find things worth doing, and you have little trouble locating kindred spirits among students and faculty because you keep running into them. Manhattanville's size is also academically advantageous. It's easy to get involved in research and lasting friendships are formed between students and faculty members.

A Distinctive Liberal View

Manhattanville considers its approach to liberal arts education as somewhat distinctive. This is based on the conviction that liberal learning is as pertinent as ever before — to the individual and to society as well. The school's experience has been that a broad, challenging, humanizing education is the firmest foundation for any future endeavor. The record of Manhattanville graduates validates this approach.



Portfolio Challenge for a College Degree

The core of Manhattanville's academic program is the Portfolio System. Through the portfolio system, you are confronted with the challenge of designing your entire academic program. It is a demanding effort because you continually have to articulate what you are trying to achieve, but the end result is a greater awareness of where you are going and how well you are progressing. At the end of four years, you have accumulated, within your portfolio, tangible evidence that you have acquired the knowledge and skill symbolized by a college degree.

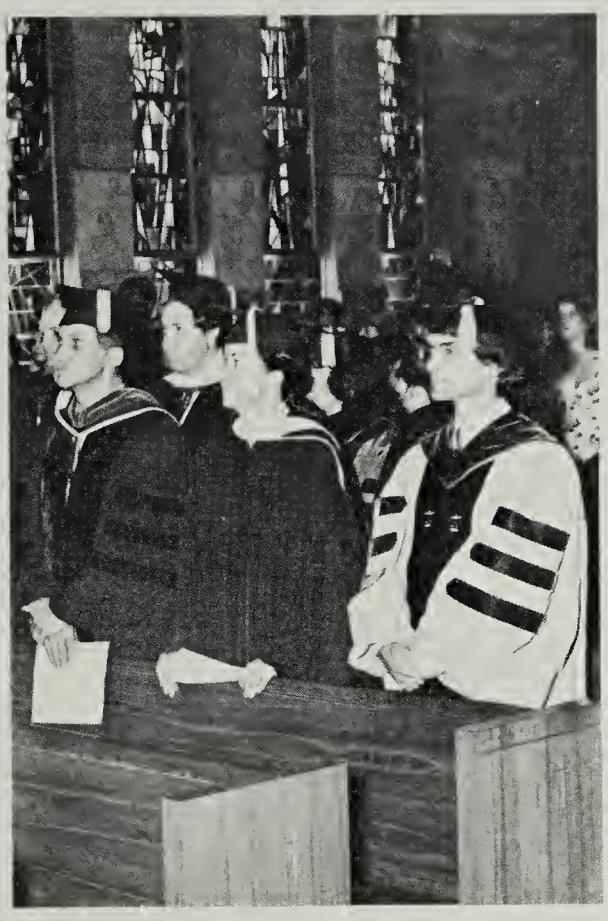
MANHATTANVILLE

CAMPUS LIFE

Convocation Starts 80-81 Academic

" . . . the teacher encouraged us to follow our hearts — to reach for our wildest ambitions because we would never be in such a position again. What position? That of having no responsibilities except to ourselves — the freedom to dare to be who we wanted to be, perhaps only to fall on our faces. The freedom to fail is still freedom."
Siobhan Flynn '81

Year



"Some students take risks and explore areas which seem alien to them, areas in which their skills will probably not test out to an "A". But risking fearlessly the humiliations of an average-destroying "C+", these students explore different areas of the curriculum. From the point of view of the portfolio review board, these students have a heroic quality and the Board develops its list of heroes and heroines, some of whom appear on a list called Distinction at First Review or Superior at Final Review, and some of whom Board members remember as simply outstanding for their capacity to take risks to achieve growth."
